SUMMARY

.NET Full-Stack Developer at Capgemini delivering end-to-end solutions across ASP.NET Core Web APIs and Angular frontends for enterprise workflow systems. Achieved 30% API performance improvement via SQL query optimization. Azure Developer Associate (AZ-204) certified. Strong focus on clean architecture, JWT-secured APIs, and cloud-native development on Microsoft Azure.

TECHNICAL SKILLS

- **Languages:** C#, JavaScript
- **Frameworks:** ASP.NET Core Web API, ASP.NET MVC, Angular, EF Core
- **Databases:** SQL Server, MySQL
- **Cloud:** Microsoft Azure (App Services, Azure Functions, Blob Storage, Azure SQL), Azure AD
- **Tools / Testing:** Git, GitHub, Postman, Swagger, Visual Studio, VS Code, xUnit, NUnit, Jasmine
- **Concepts:** RESTful APIs, OOP, SOLID Principles, Dependency Injection, Clean Architecture, JWT Authentication, RBAC

WORK EXPERIENCE

Capgemini **Jan 2025 – Present**
Software Developer(.NET Full Stack) **Bengaluru, Karnataka**

- Designed and shipped 10+ RESTful APIs in ASP.NET Core using Repository pattern, for an internal enterprise workflow management system, automating approval processes and reducing manual processing effort across teams.
- Built secure, role-based access control with JWT authentication and automated email notifications for a multi team application, improving data governance across departments.
- Profiled and rewrote critical SQL queries using execution plan analysis, cutting average API response time by ~30% and improving application throughput under concurrent load.
- Developed Angular components and integrated RESTful APIs for internal enterprise UI, enabling dynamic data rendering and improving usability across multiple teams.
- Wrote unit and integration tests using xUnit for core API endpoints, reducing regression bugs during sprint releases.

PROJECTS

E-Commerce Platform | Tech Stack: C#, ASP.NET Core Web API, Angular, EF Core, SQL Server
GitHub: github.com/PiyushKumar495/EShoppingWebsite-Project

- Built a full-stack e-commerce platform handling product catalogue, cart, and order lifecycle on an 8-entity EF Core schema with foreign key constraints ensuring transactional consistency across operations.
- Integrated Angular frontend with RESTful APIs for dynamic product filtering, cart management and secure checkout flow.
- Deployed on Azure App Service with Azure SQL Database for cloud-based hosting.

Cooking Recipe Portal | Tech Stack: C#, ASP.NET Core Web API, Angular, EF Core, SQL Server
GitHub: github.com/PiyushKumar495/CookingRecipePortal

- Built a multi-role recipe management platform where admins can moderate content and users can submit, rate, and edit recipes. Implemented JWT-based authentication with role-based route guarding on both API and Angular frontend.
- Built interactive Angular Material UI with ratings, reviews, and inline editing, delivering a responsive experience across admin and user dashboards.

CERTIFICATIONS

- Microsoft Certified: Azure Developer Associate (AZ-204) **Feb 2026**
- Microsoft Full-Stack Developer Professional Certificate **Dec 2025**
- Microsoft Certified: Azure AI Fundamentals **Nov 2025**

ACHIEVEMENTS

- Contributed to open-source projects during Hacktoberfest by raising and merging pull requests.
- Secured 4★ ratings in SQL on HackerRank and solved 200+ DSA problems on LeetCode

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science **May 2025**
Lovely Professional University, Phagwara, Punjab
